Invensys Controls Selects Requisite Software Data Management Solution

Global Provider of Technology and Controls Chooses Leading Data Management and Improvement Solution

Chicago, IL - July 1, 2010 – [Requisite Software Inc.](#), a leading provider of channel management and master data management solutions, announced today that [Invensys Controls](#) has selected Requisite Software's [eMerge solution](#) to provide a total data management solution that will enable Invensys to cleanse, normalize and centralize all product and parts information in a global product repository.

Invensys Controls selected Requisite Software to provide a master data management solution that will allow Invensys to categorize, cleanse and enhance data, enabling improved search and compare capabilities. The eMerge solution will standardize purchased material item masters from multiple ERP systems into a central database, providing the ability to enforce data governance standards across the company and streamlining supply chain operations.

"Requisite Software's eMerge solution will reduce our duplication rate, translating to over \$1 million in savings," said Mark Wisniewski, IT manager at Invensys Controls.

About Requisite Software

Requisite Software Inc. is a provider of industry-leading master data management solutions that enable companies to turn raw product data from disparate systems into unified, actionable information. Requisite Software enables industry-defining enterprises such as, Gexpro, Exiros and Repsol to ensure cost savings by providing consolidated, unified and consistent product data. More information can be found at www.requisite.com.
